Objective

Recent CS graduate focusing on front-end development using JavaScript and related technologies. Over 2 years of experience working on personal and course related web application projects. I am passionate about software development and am eager to expand my knowledge on the subject to create better products.

Education

University of Southern Mississippi
Bachelor of Science
Computer Science
Hattiesburg, MS
2020 – 2022
GPA: 3.72

Experience

August 2017 – December 2022
Commercial Floor Installation • Jesco Flooring • Taylorsville, MS

I worked as part of a crew whose responsibility it was to remove and install flooring in commercial buildings such as offices, schools, and hospitals.

Key Skills

Languages
HTML
CSS
JavaScript

Libraries
React

Frameworks
Node.js

Projects

August 2022 – December 2022
Inventory Management System • Developer

This was a team project where my responsibilities included creating the API to manipulate an SQL database using Node with express. I also used React to create the UI/UX to allow users to view and work with the data.

February 2023 – March 2023
Personal Portfolio • Designer, Developer

This is a personal project I created using react and tailwind to demonstrate my ability to design, create, and deploy a responsive and interactive web application.
